

BraveAspire

AI BDM Platform

End-User Guide

How to navigate every screen, what fields to fill in,
and the end-to-end workflow

Version 2.0 • May 2026

Table of Contents

- | | |
|-----|--|
| 1. | Quick start (5 minutes from zero to first email) |
| 2. | Logging in |
| 3. | Settings — required configuration |
| 4. | Lead Scraper — discover companies |
| 5. | Companies — your prospect list |
| 6. | Contacts — decision-makers |
| 7. | Outreach — emails, LinkedIn, WhatsApp, proposals |
| 8. | Follow-ups — automated reminders |
| 9. | AI Chat assistant |
| 10. | Workflow — autonomous BDM pipeline |
| 11. | Analytics dashboard |
| 12. | User management (admin only) |
| 13. | Troubleshooting |
| 14. | Quick reference — mandatory fields |

1. Quick start

Follow these ten steps to go from a fresh install to your first AI-personalised cold email — typically under five minutes.

- | | | |
|-----------|--------------------------|---|
| 1 | Open the app | Go to http://localhost:8501 in your browser |
| 2 | Log in | Use admin@braveaspire.com / Admin@123! (default super-admin) |
| 3 | Configure SMTP | Settings → ■ Email → enter Gmail + App Password → Test |
| 4 | Configure AI | Settings → ■ AI → paste Groq key or run Ollama locally → Test |
| 5 | Add Apify token | Settings → ■ API Keys → paste <code>APIFY_API_TOKEN</code> → Save |
| 6 | Scrape leads | Lead Scraper → enter 'IT companies' + 'Hyderabad' → Start |
| 7 | Import to CRM | Select top 5 results → ■ Import to CRM |
| 8 | Find contacts | Companies → pick one → ■ Find Contacts by AI |
| 9 | Personalise email | Outreach → ■ AI Personalize → review draft |
| 10 | Send | ■ Send Now — open/click tracking + 3 follow-ups auto-scheduled |

2. Logging in

There is no public sign-up — only admins can create accounts. On a fresh install, the system seeds a default super-admin:

■ ■ **Default credentials:**

Email: **admin@braveaspire.com**

Password: **Admin@123!**

Change this immediately under **Settings** → ■ **Security**.

Screen — Login page

Mandatory fields

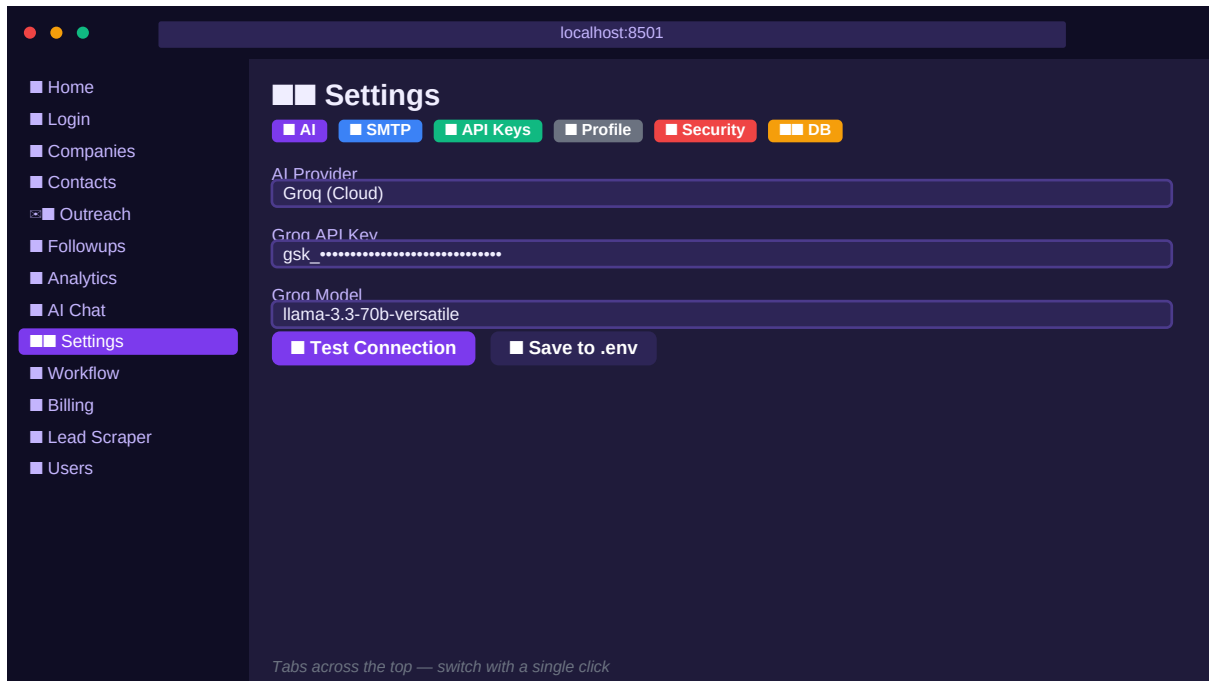

Field	Required?	Notes
Email	■ Yes	Your registered work email
Password	■ Yes	Minimum 6 characters

Alternative — passwordless OTP login

Field	Required?	Notes
Mobile number	■ Yes	E.164 format, e.g. +919876543210
6-digit OTP	■ Yes	Arrives via SMS (Twilio) — or check server logs in dev mode

3. Settings — required configuration

The Settings page has **9 tabs**. Three of them must be configured before you can use the app productively: **AI**, **Email/SMTP**, and **API Keys**. The rest are optional.

■ AI tab — required

Field	Required?	Notes
Provider	■ Yes	Ollama (local, free) OR Groq (cloud, faster)
Ollama URL	If Ollama	Default http://localhost:11434
Ollama Model	If Ollama	e.g. llama3, mistral, deepseek-coder
Groq API Key	If Groq	From console.groq.com
Groq Model	If Groq	Default llama-3.3-70b-versatile

■ Email / SMTP tab — required

Without this, no outreach emails can be sent.

Field	Required?	Notes
SMTP Host	■ Yes	e.g. smtp.gmail.com
SMTP Port	■ Yes	Usually 587 (TLS)
SMTP Email	■ Yes	Your sending address
App Password	■ Yes	Gmail: enable 2FA then generate an App Password
From Email	Optional	Defaults to SMTP Email
From Name	Optional	Display name e.g. 'BraveAspire Team'

■■ **Gmail setup:** enable 2-Factor Authentication → Google Account → Security → App Passwords → generate a 16-char password → paste that into **App Password** above (NOT your normal Gmail password).

■ API Keys tab — recommended

Without at least one of these, the Lead Scraper returns only demo data. **Apify is the easiest single key** — it covers Google Maps, LinkedIn, and Indeed scraping in one subscription.

Field	Required?	Notes
Apollo.io key	Optional	Best contact + email data
Google Maps key	Optional	Local business search
Crunchbase key	Optional	Startup funding firmographics
Proxycurl key	Optional	LinkedIn enrichment
Apify token	■ Recommended	Easiest — covers multiple sources
Hunter.io key	Optional	Email discovery from domains
Twilio SID/Token	If SMS OTP	From console.twilio.com

4. Lead Scraper

Module 1 of the pipeline — discover prospects from Apify, Apollo, Google Maps, Crunchbase, Clutch.co, Indeed, and Naukri.

Mandatory inputs

Field	Required	Example
Search query	Either	Free-form, e.g. 'SaaS startups hiring Python'
Industry	Either	e.g. Fintech, Healthcare, SaaS
Location	Either	e.g. Hyderabad, Mumbai, San Francisco
At least 1 source	■ Yes	Check at least one box from Apify / Clutch / Indeed / etc.

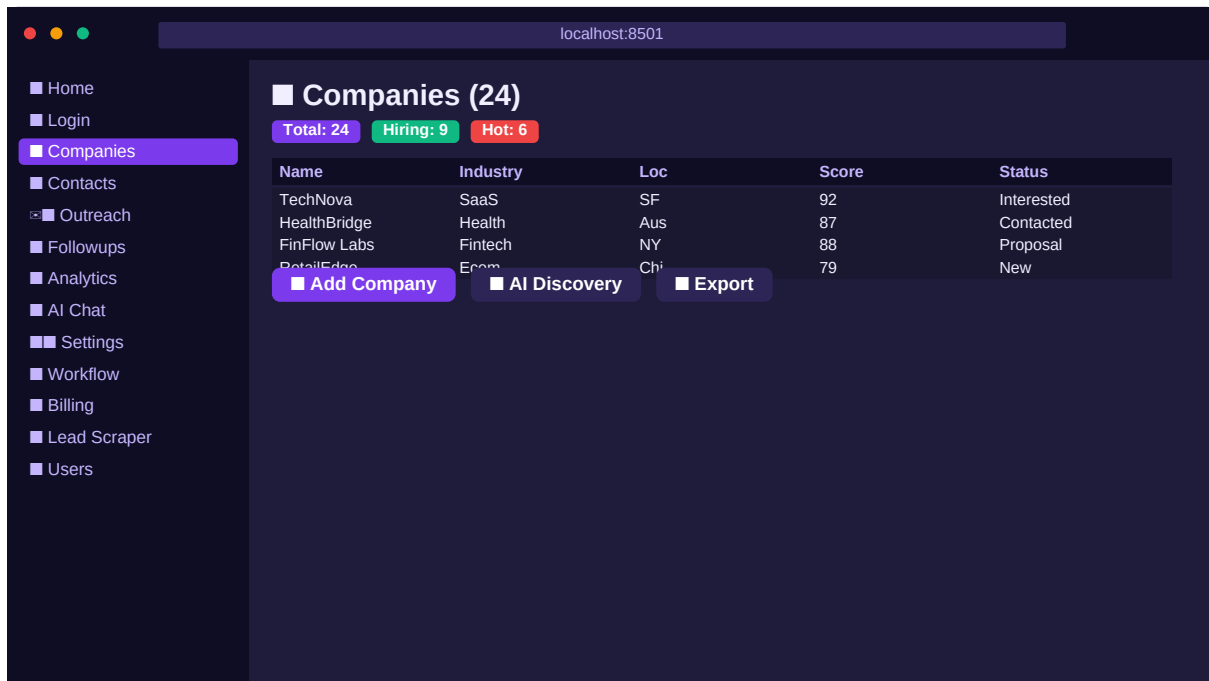

Optional refinements

Field	Required?	Notes
Employee size	Optional	e.g. 50-200, 100-500
Technology	Optional	e.g. React, Python, Node.js
Actively hiring	Optional	Filter to companies posting jobs
Has funding	Optional	Only Series A+ etc.
Outdated tech	Optional	Companies flagged as legacy

■■ Apify free plan: ~1 Google Maps search per 30 minutes. If you see a 'TIMED-OUT' warning, wait a few minutes and try again, or upgrade at apify.com/pricing for unlimited runs.

5. Companies

Your CRM database of prospect companies. View, filter, edit, or add manually.

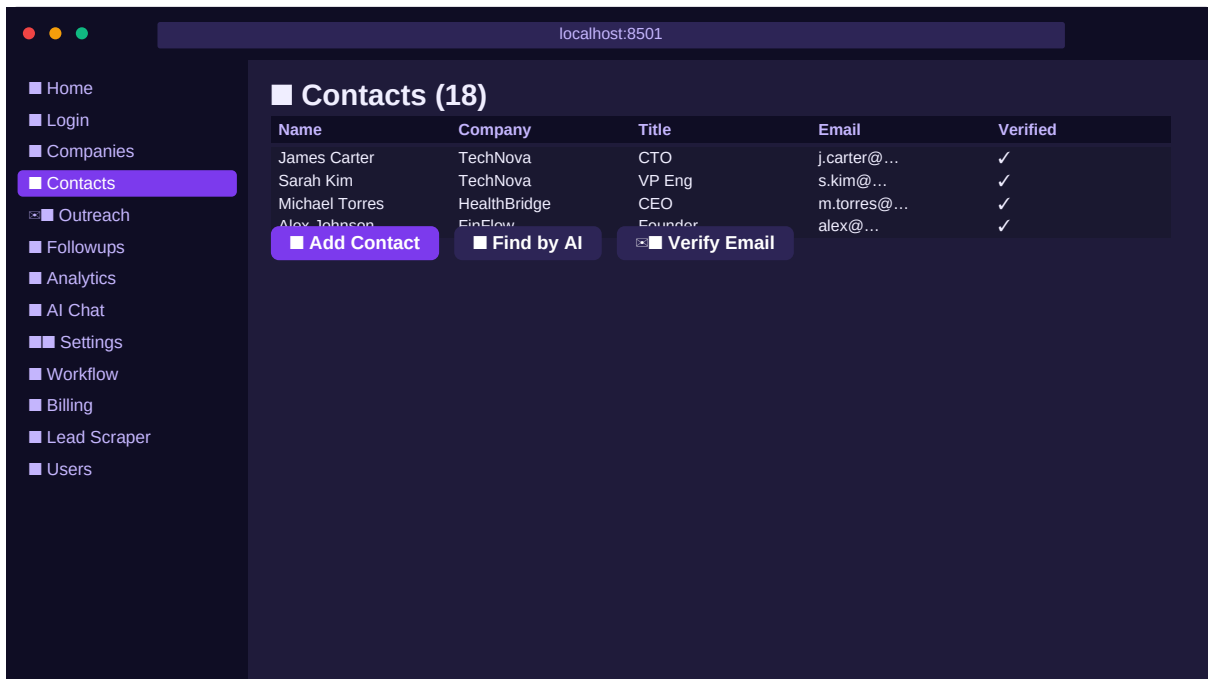

Add Company dialog

Field	Required?	Notes
Company Name	■ Yes	e.g. Acme Corp
Website	Optional	e.g. acme.com
Industry	Optional	Free text or pick from list
Location	Optional	City, Country
Employee Size	Optional	Integer
Revenue	Optional	e.g. \$1M-\$5M
Status	Optional	New / Contacted / Interested / Proposal / Won / Lost
Hiring?	Optional	Checkbox
Tech Stack	Optional	Comma-separated
Pain Points	Optional	Free text — AI uses this for personalisation

6. Contacts

Decision-makers at your target companies. Each contact belongs to a company.

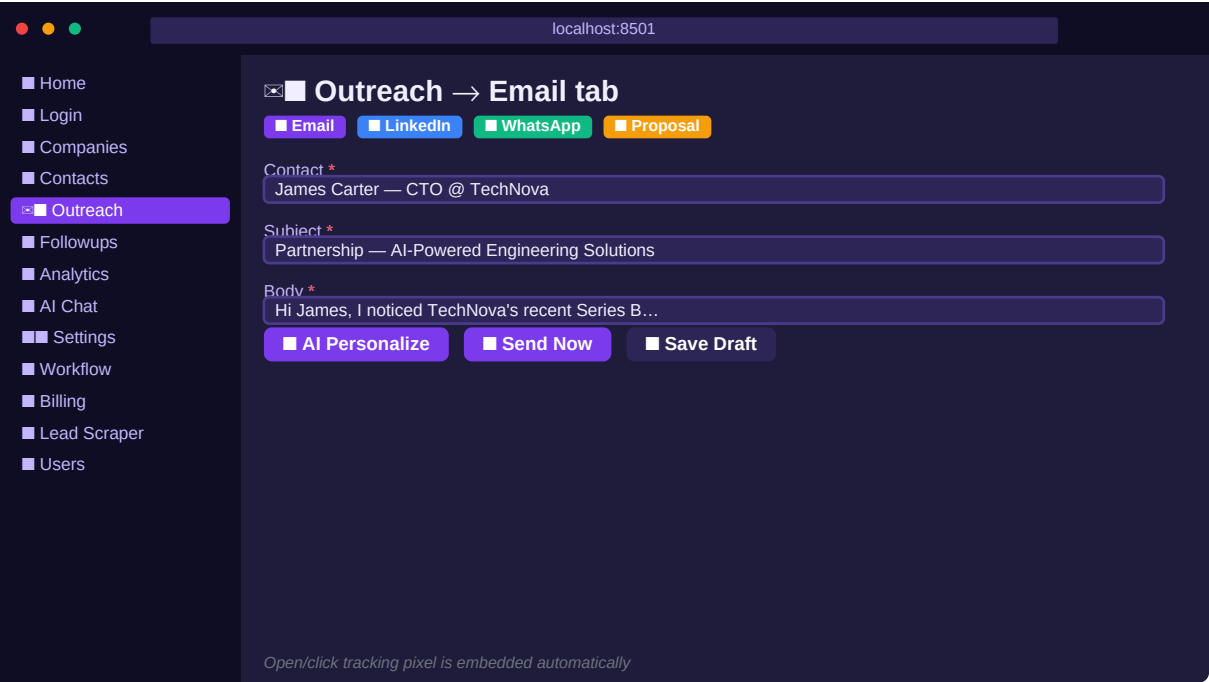

Field	Required?	Notes
Company	■ Yes	Pick from your Companies list
Name	■ Yes	Full name
Designation	Recommended	Title — used in AI personalisation
Email	Recommended	Required to actually send outreach
LinkedIn URL	Optional	Full https URL
Phone	Optional	E.164 format
Verified	Optional	Checkbox once email is confirmed

■ Find Contacts by AI

From any company's detail view, click **Find Contacts by AI**. The system uses GPT/Llama to guess likely decision-makers (CTO, VP Engineering, Head of Product etc.) and Hunter.io to predict their email pattern. Review and add the ones that look correct.

7. Outreach

Send personalised messages across **4 channels**: Email, LinkedIn, WhatsApp, and Proposal. Each has its own tab.

Field	Required?	Notes
Contact	■ Yes	Pick from your contacts list
Subject	■ Yes	Or use ■ AI Personalize to generate
Body	■ Yes	Or use AI Personalize
Channel	Auto	Email / LinkedIn / WhatsApp
Schedule for later	Optional	Pick date+time, or send immediately

Outreach statuses

■ Draft	Saved but not sent
■ Sent	Email delivered
■■ Opened	Recipient opened (tracking pixel fired)
■ Replied	Recipient replied (detected by IMAP)
■■ Bounced	Invalid address
■ Scheduled	Queued for later

8. Follow-ups

When you send an outreach, the system automatically creates **3 follow-up reminders** at +3, +7, and +14 days. You can edit or cancel any of them.

#	Contact	Original Subject	Due	Status
1	James Carter	Partnership Opport	in 2d	Scheduled
2	Sarah Kim	AI Engineering Sol	in 5d	Scheduled
3	Michael T.	Modernizing Health	tomorrow	Scheduled

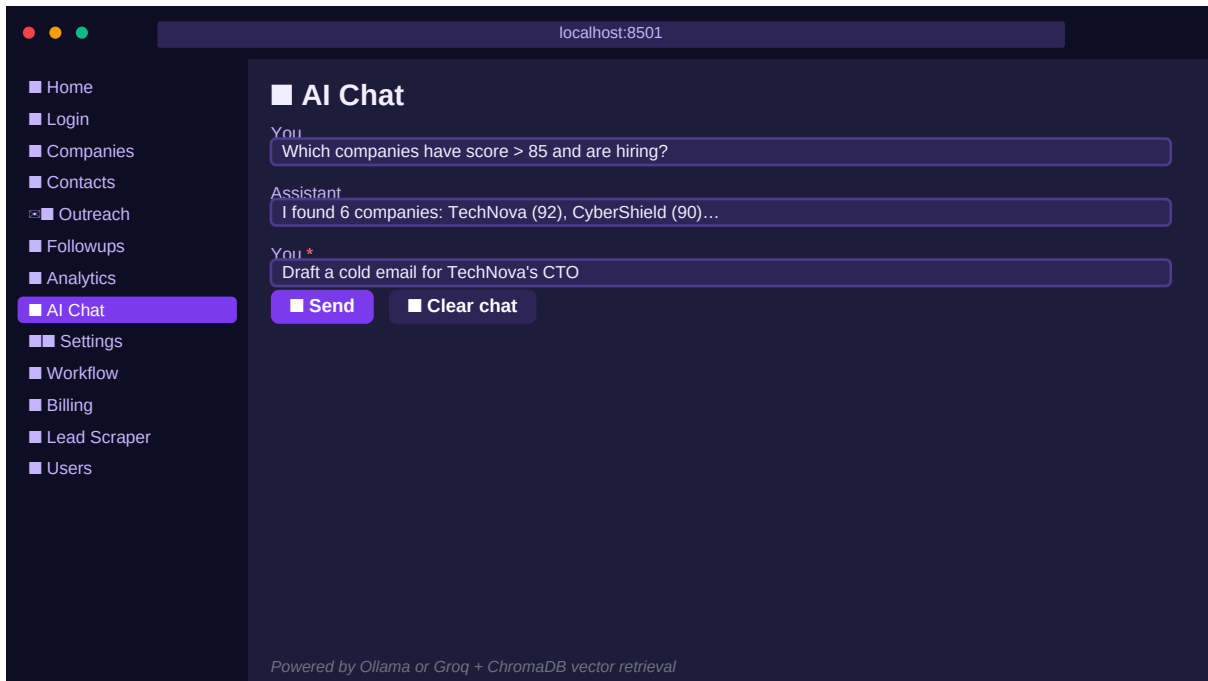

■ Edit ■ Send Now ■ Mark Done ■ AI Suggest Reply

Statuses auto-update — no mandatory fields, all pre-filled

■■ Follow-ups have **no mandatory fields** — subject and body are auto-generated from the original outreach. You only need to edit them if you want to customise the wording.

9. AI Chat assistant

Conversational interface to your CRM. Ask questions in plain English — the AI uses ChromaDB vector search to ground its answers in your real company and contact data.

Example prompts to try

- Show me companies with score above 80
- Which contacts haven't been emailed yet?
- Summarise my pipeline this week
- Draft a follow-up for HealthBridge
- Find similar companies to FinFlow Labs

10. Workflow — autonomous BDM pipeline

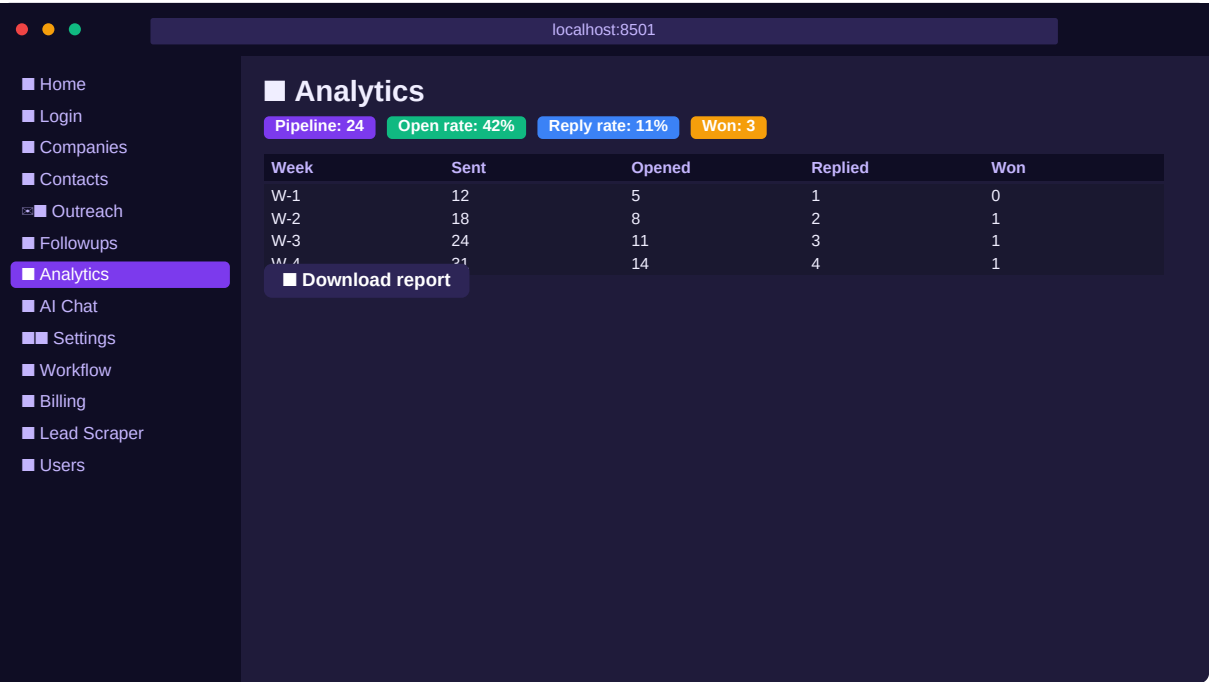

Runs all 5 agents end-to-end: **Scrape** → **Find Contacts** → **Personalise** → **Send (with approval)** → **Track**. The pipeline pauses at the Send step for human approval unless you enable auto-send.

The screenshot shows a web application interface for the 'Workflow — Autonomous BDM Pipeline'. The interface is dark-themed with a sidebar on the left containing navigation links: Home, Login, Companies, Contacts, Outreach, Followups, Analytics, AI Chat, Settings, Workflow (highlighted), Billing, Lead Scraper, and Users. The main content area has a header 'localhost:8501' and a title 'Workflow — Autonomous BDM Pipeline'. Below the title, there are three input fields: 'Target description *' with the value 'Fintech startups in India hiring backend engineers', 'Max companies *' with the value '10', and 'Auto-send (HITL)' with the value 'Unchecked — you approve each email'. At the bottom of the form are three buttons: 'Run Workflow' (highlighted), 'Pause', and 'View history'. At the very bottom of the interface, a small text line reads '5 agents: Scrape → Find Contacts → Personalise → Send → Track'.

Field	Required?	Notes
Target description	■ Yes	Plain-English brief, e.g. 'Fintech in India hiring backend engineers'
Max companies	■ Yes	1–20 (start small, increase later)
Auto-send (HITL)	Optional	Off = human approves each email. On = fully autonomous

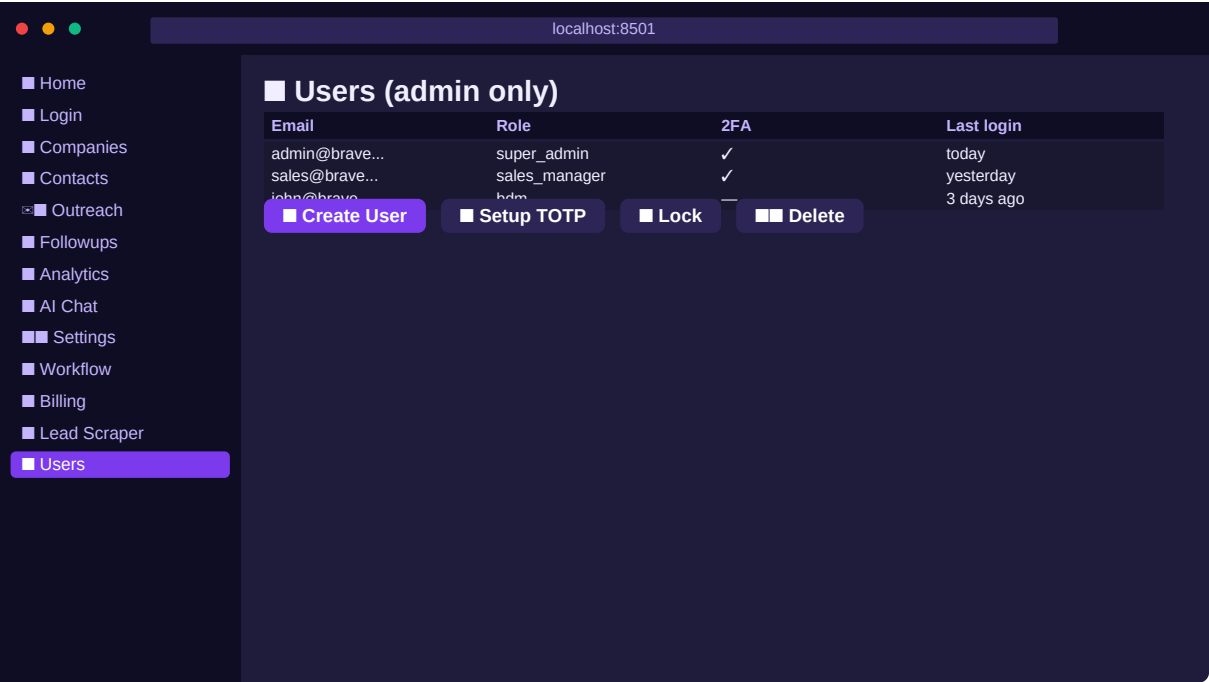

11. Analytics

Read-only dashboards — no fields to fill in.

12. User management

Visible only if your role is **admin** or **super_admin**. Create accounts, assign roles, manage 2FA, lock/unlock.

Create User dialog — mandatory fields

Field	Required?	Notes
Email	■ Yes	Must be unique
Full name	■ Yes	First + last
Role	■ Yes	super_admin / admin / sales_manager / bdm / sales_executive / viewer
Mobile	Optional	E.164, needed for SMS-OTP login
Department	Optional	e.g. Sales, Marketing

■■ A temporary password is auto-generated and emailed to the new user. They will be forced to change it on first login.

13. Troubleshooting

Symptom	Cause	Fix
'Start Scraping' does nothing	All three query/industry/location fields empty	Fill at least one
Lead Scraper returns Demo only	No API keys configured	Settings → ■ API Keys → add Apify token
Apify TIMED-OUT / rate limit	Free plan ≈ 1 Google Maps run / 30 min	Wait, or upgrade Apify plan
SMTP credentials not configured	Gmail App Password empty	Settings → ■ Email → fill all four fields → Test
Account locked	5 failed password attempts	Wait 15 minutes OR ask admin to unlock
QR code not showing for 2FA	qrcode/PIL libraries missing	pip install qrcode[pil] Pillow pyotp
'String would be truncated' on import	Column too small (legacy DB)	Already fixed in v2.x — restart the app
OTP not arriving via SMS	Twilio not configured	Settings → ■ → fill Twilio. Or check logs for OTP in dev mode
AI Chat: 'service unavailable'	Ollama not running, or bad Groq key	Settings → ■ AI → Test Connection

14. Quick reference — mandatory fields

One-glance summary of every screen and what you must fill in.

Screen	Must fill
Login (password)	Email, Password
Login (OTP)	Mobile, OTP
Settings — AI	Provider; Ollama URL+model OR Groq key+model
Settings — SMTP	Host, Port, User, App Password
Settings — Profile	(none — but Name/Company recommended)
Lead Scraper	≥1 of: Query / Industry / Location; ≥1 source
Add Company	Company Name
Add Contact	Company, Name
Outreach	Contact, Subject, Body
Workflow	Target description, Max companies
Create User	Email, Full Name, Role

✓ Everything else on every screen is **optional** and will either have a sensible default or be auto-generated by the AI.
